

# Powerport Business Services and Entertainment Media Kiosk

*Delivering time saving business services and entertainment media making it easy for your customers to be on the ground.*

## **Delivering broadband Internet access to your customers around the clock**

Powerport kiosk stations provide business and leisure travelers with reliable, broadband Internet access, housed in a sturdy well-constructed and easy-to-use machine. Loaded with advanced features, Powerport kiosks make it easy to browse the Web, send and receive email, make internet telephony calls, utilize desktop productivity tools and download music and much more.

## **Convenient access to Internet Services and Entertainment Media your travelers want**

Powerport kiosks make it easy and convenient for you to provide your travelers with in-demand business services and media entertainment, maximizing their time on the ground. Now you can provide a convenient, easy-to-use and flexible way for them to connect to work, home and all the other things that internet access allow, including; broadband telephone services and entertainment. Powerport kiosks are the easy way for you to deliver business services and entertainment media to travelers to Travel – Stay Connected – Be Productive.

## **A risk-free way to turn empty space into a Customer Service multi-revenue source center**

Only Powerport kiosks combine in-demand customer services plus income into one unique unit. Each Powerport turns floor and unused areas around pillars into customer service islands and risk-free revenue-sharing model. Powerport placements serve the greatest number of passengers per square foot. Company owned and operated, you receive a high percentage of the gross sales generated from all features including Internet access, laptop rentals, battery charging and entertainment media downloads on all Powerport kiosks deployed in your facilities.

## **No cost to you for the unit or installation required**

We provide Powerport kiosks including, delivery, installation and maintenance at absolutely no cost to your facility.

## **Support 24/7**

Each Powerport has a 24/7 Customer Service support line via a handset physically located on the unit. The systems are regularly cleaned and maintained either by our DBE partner with a national presence or a local firm recommended by the Airport Authority.

## **Future Proof**

Power Station products offer a unique combination of business services and entertainment media. The Powerport enables you to combine these unique services to meet the criteria of your airport. Services can be added or removed within the same kiosk as usage patterns and technology dictate.

## **Security**

All data, including Internet session temporary files, are wiped clean from the stations including laptop rentals once a user ends their session. All Powerport stations have state-of-the-art, FBI class, fingerprint readers which are in compliance with Department of Transportation TSA regulations. A fingerprint is required to use the charging vaults or rent a laptop at all airport locations.
